Turn off the light

Induction mode

(The light is at 100% brightness when
someone is nearby, 30% brightness
when someone has left.)

Constant bright mode

(Constant bright mode with no
motion sensing function. The light is
always on.)

Warning

- Please avoid looking directly at the light.
- The disassembly process must be carried out in a safe place.
- Do not short circuit or disassemble: Do not put in water or near fire.
- Without expert guidance, it is forbidden to repair and dismantle lamps by yourself: The supplier is not responsible for any consequences caused by improper operation or improper maintenance by the user.

User Manual

ALL-IN-ONE SOLAR STREET LIGHT

Thank you for choosing our product.

- For any questions, free to call or email us any time.
- Please refer to the actual product If the diagrams provided shows a slight difference.
- Before using the product, please read the following precautions carefully to avoid damage or errors.

Product Introduction

Solar light is an electric lamp which converts light energy into electricity by solar panels. The advantage of the solar light is no wiring, easy to installation and without electricity. In the day, solar panel absorbs the sun's light and convert to electricity and store in batteries. At night, the lamp will turn on automatically.

Parameter

Rated Power	50W/100W/150W/200W/250W/300W
Lighting Mode	Time Control/Motion sensing/Light control
Solar Panel	Polycrystalline
Battery Type	LiFePO4
Material	ABS
IP Rating	IP65

Installation Guide

Installation Guide

Back, as shown in the picture:

1. Insert the lamp arm into the lamp body and tighten the screw.
2. Please select the appropriate product according to the installation site's sunlight intensity and required operating time. If you are in the northern hemisphere, face the solar panels towards the south as far as possible when installing the solar light; if you are in the southern hemisphere, face the solar panels towards the north.
