Copper-free Aluminium

Petroleum storage, ocean marine, aerospace field, chemical industry, metal treatment, solvent-based paint workshops, and alcohol industry

This explosion-proof light features a 2 x 3W output with 130 lumens per watt and a color temperature of 5500-6000K. Designed for hazardous environments, it includes an adjustable 120° beam angle, IP66 and IK10 ratings, and operates in temperatures from -40°C to +60°C. With a battery life of over 120 minutes and a lifespan exceeding 50,000 hours, it's built for reliability. Certified with CE, UKCA, Ex, CB & ATEX, and housed in copper-free aluminum, this light is ideal for petroleum storage, aerospace, chemical industries, and more. Dimensions: 243mm x 570mm x 55mm. Comes with a 5-year warranty.
