

Technical Details

MAX power	600 W
Tension	220-240V AC
Nominal Voltage	90-264V AC
Frequency	50-60 Hz
Current intensity	10 A
Dimmable	Yes
Use	Indoor
IP protection	IP20
Material	PCB
Installation	Recessed

dimensions	87 mm x 87 mm x 54 mm
Height	87 mm
Width	87 mm
Length	54 mm
Ambient Working Temperature	-20 °C~+50 °C
Includes	IR remote control
Certificates	RoHS, CE, UKCA
Warranty	3 years
Type of dimming	Remote Control, 1-10 V

Description

This 1/10V LED Dimmer with an IR Remote Control that works at 90-240V AC and allows us to control the brightness, from 0-100%, of all LED solutions that require dimming, like the products that can be found in the 'Accessories' section.

With this LED Dimmer we can create welcoming environments and at the same time, we can create a well-lit environment, all with the simple twist of the dimmer switch or with the press of a button on the included remote control with an infrared sensor (10-15 metre range). Said controller allows us to adjust the brightness of the lights at a distance, and also assign turn-off times.

*It can withstand an approximate charge of 600W.

*It incorporates a built-in box for a surface installation.
