Applications	Ranging from oil and gas operations and chemical plants to underground coal mining and confined-space inspections . Its versatile beam modes—spot for focused tasks and flood for general area illumination—combined with a lightweight, cordless design make it ideal for maintenance crews, emergency response teams, and inspection work in remote or hard-to-reach locations. This product also enhances on-site safety with selectable brightness levels and built-in warning signals, making it indispensable wherever reliable, portable lighting is vital in hazardous conditions
